

ThermoCall Compatibility List

ThermoCall for OE Telestarts

TC3 and TC4 Entry & Advanced

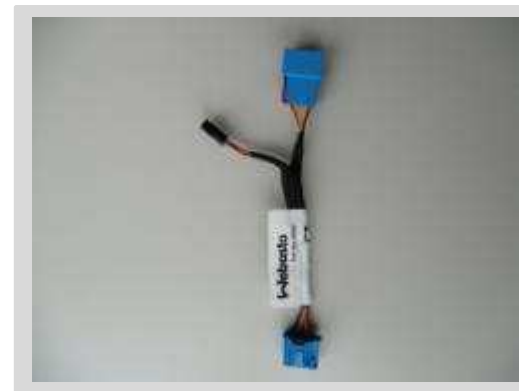

For some brands the ThermoCall receiver can be mounted in between OE cable harness and OE Telestart receiver using an adapter cable

Suitable for: ThermoCall TC3 (7100350D) and ThermoCall TC4 Entry & Advanced (9032141A)

HowTo: 1. Disconnect OE Telestart receiver from OE cable harness
2. Connect adapter cable in between
3. Connect receiver (TC3 / TC4 Entry & Advanced) to 4 pin connector of the adapter cable

Material number: 1319873A
Adapter cable for OE-heaters using standard Telestart receiver

Material number: 1320931A
Adapter cable for OE-heaters using VAG Group specific Telestart receiver

Parameters for different ThermoCall Integrations / Operation mode:

- Operation mode setting
 - 1234op:0 – steady mode
 - Needed for Telestart receivers with a steady high input according the duration
 - 1234op:1 – impulse mode
 - Needed for Telestart receivers with a high impuls input to activate and deactivate heating or venting
 - Attention: Turn off by the control device which turned the heater on
 - Attention: The maximum duration of the ThermoCall must be lower than the set up in the driver infomation system
